

Acknowledgment to Reviewers

The editors of PEDOSPHERE would like to sincerely acknowledge the continuous support of the following reviewers, who returned at least one review during the period from January 1, 2016 to December 31, 2016. These reviewers provide the editors with timely, thoughtful, and detailed reviews that are also enormously helpful to authors, encourage revision, improve manuscripts, and enhance level of the research published in the journal, and many reviewers complete several reviews each year.

The Editorial Committee of PEDOSPHERE relies on the wisdom, experience, and advice of many experts in deciding which topics to pursue, which manuscripts to publish, and what modifications to make to ensure scientific accuracy and suitability for readers of the journal. We appreciate the critical evaluation, constructive comments, invaluable assistance, and selfless dedication of the reviewers. Special thanks for timely high-quality reviews guiding selection for priority publication in 2016 of manuscripts that cover current hot topics of soil science research, such as phosphorus use efficiency of bio-based fertilizers and organic amendments (He *et al.*, 2016; Vaneeckhaute *et al.*, 2016), phytoremediation of polluted soils (Sheoran *et al.*, 2016; Wiszniewska *et al.*, 2016), simultaneous improvement of crop yield and nitrogen use efficiency (Meng *et al.*, 2016), soil processes during freeze-thaw cycling (Zhang *et al.*, 2016) and carbon dynamics (Sofi *et al.*, 2016) under current climate change, risk assessment of contamination (Teh *et al.*, 2016), and mycorrhizal status in wetland ecological systems (Xu *et al.*, 2016). We apologize for any errors or if we have inadvertently left a reviewer's name off this list although efforts have been made to ensure the accuracy of the list.
