

Acknowledgment to reviewers and guest editors

The continued success of *Pedosphere* relies on the support of authors and reviewers. On behalf of the Editorial Committee and the submitting authors of *Pedosphere*, we would like to sincerely acknowledge the continuous support of the reviewers and guest editors listed below, who have contributed their time and returned at least one review and decision during the period from January 1, 2022 to December 31, 2022, on a voluntary basis. These reviewers and guest editors have provided the editors with timely, thoughtful, and detailed reviews and decisions that are also enormously helpful to authors, encourage revision, improve manuscripts, and enhance level of the research published in the journal. Some guest editors have invited and/or handled several submissions, and many reviewers have completed several reviews in this year.

The Editorial Committee of *Pedosphere* relies on the wisdom, experience, and advice of many experts in deciding which topics to pursue, which manuscripts to publish, and what modifications to make to ensure scientific accuracy and suitability for readers of the journal. We appreciate the critical evaluation, constructive comments, invaluable assistance, and selfless dedication of the reviewers and guest editors. Special thanks to the reviewers for their timely high-quality reviews guiding selection for priority publication of excellent papers that cover current hot topics and advances of global soil science research and those on topics at the frontier of soil science and related fields. Special thanks to the guest editors for their willingness to share their knowledge and experience with us and their efforts in ensuring that the articles to be published in special issues meet the highest standards of excellence. We apologize for any errors or if we have inadvertently left a reviewer's name off the list below although efforts have been made to ensure the accuracy of this list.
